

TwinN Crop Trial

Organic Plums 2008

A TwinN field study in Saxony, Germany.

Treatments

A single foliar application of **TwinN** to 80, four year old organic plum trees in June 2008. Optimum soil conditions, no other treatments given.

Key Results

TwinN plums trees exhibited enhanced growth, & larger fruits with increased yield. When independently taste tested by the buyer with members of the public 100% of subjects preferred the **TwinN** plums to the control plums indicating that the taste of the **TwinN** plums was superior to the control.
